

## Polar Body Analysis Kit

Polar body extraction

Single cell deposition slide

AmpliSpeed slide cycler

### Features

- Checks presence or absence of genetic material of human chromosomes
- PCR based analysis
- Full chromosome panel (1–22 + X)
- Redundant chromosome analysis (5 loci each)
- Ultra –fast workflow (5.5 hours)

### Applications

- In vitro fertilization
- Single cell analysis

### Advantages

- Deposition control prior to analysis
- Objective results, no interpretation needed
- Bias-free loci specific amplification
- Turn-key solution

### Order Information

Ref.-No.	Product	Description
OAX04517	Polar Body Kit (1)	Complete kit for the analysis of 20 polar bodies, incl. slide for deposition (OAX04228)
OAX04525	Polar Body Kit (bulk)	Reagent kit for the analysis of 200 polar bodies, comes without deposition slide (OAX04228)
OAX04228	Single cell slide	Slide for deposition of 20 polar bodies
